Aurora Workflow Orchestration — Repository Index

This index provides structured navigation for the **Aurora Workflow Orchestration (AWO)** repository.
Each section links to verified, versioned artifacts that define the framework's design, governance, and execution.

---

1. Core Documentation

Document	Description
`README.md`	Primary overview and orientation for AWO.
`docs/AWO_Method_Spec_v1.1.md`	Formal specification of the AWO methodology (citable reference).
`docs/AWO_Whitepaper_v1.0.md`	Theoretical and epistemological foundation of the orchestration framework.
`docs/CHANGELOG.md`	Chronological record of repository updates and releases.
`logs/WORKFLOW_LOG.md`	Audited development timeline of AWO with verified entries per release.

---

2. Governance & Provenance

Directory	Purpose
`decisions/`	Architecture Decision Records (ADRs) documenting key governance events.
`schemas/`	JSON schemas defining reproducibility and falsifiability standards.
`templates/`	Official templates for logs, manifests, ADRs, and validation reports.
`runs/`	Signed and hashed workflow runs with full provenance records.

---

3. Automation & Execution

File / Folder	Description
`workflows/`	GitHub Actions and orchestration workflows for AWO execution.
`scripts/`	Supporting automation scripts for validation, attestation, and report generation.
`requirements.txt`	Environment dependencies for reproducible execution.

4. Reference & Citation

File	Description
`CITATION.cff`	Machine-readable citation metadata.
`citation.bib`	BibTeX reference for scholarly citation.
`.zenodo.json`	Zenodo metadata configuration (concept DOI linkage).
`LICENSE`	Apache 2.0 license for source code.
`LICENSE-CC-BY-4.0.md`	CC BY 4.0 license for documentation and text materials.

5. Supporting Files

File / Folder	Purpose
`figures/`	Visual diagrams, process schematics, and banners.
`index.json`	Machine-readable summary of repository structure.

Current Repository State

Version: v1.1.1
Release Date: 2025-10-12
Focus: Repository Hardening · Organizational Transfer to Waveframe Labs · Attestation Integration

Related ADRs:
- ADR-0014 — Repository Hardening & Organizational Transfer
- ADR-0015 — Attestation Integration & Cryptographic Signing

This index is maintained as part of the AWO provenance layer. Each section corresponds to an auditable component of the repository's epistemic and operational design.
